#### Short term complications of surgery

| Short term Complication:    | Select or Tick if present:   | If confirmed or suspected, requiring: |
|-----------------------------|------------------------------|---------------------------------------|
| Anastomotic leak            |                              |                                       |
| Prolonged ileus >7 days     | Present                      |                                       |
|                             | None                         |                                       |
| Stoma related complications | Parastomal hernia            |                                       |
|                             | Muco-cutaneous separation    |                                       |
|                             | Stoma prolapse               |                                       |
|                             | Necrosis                     |                                       |
|                             | Stoma retraction             |                                       |
|                             | Stomal stenosis              |                                       |
|                             | Peristomal skin condition    |                                       |
| Wound complication          | Superficial wound dehiscence |                                       |
|                             | Deep wound dehiscence        |                                       |
|                             | Wound requiring antibiotics  |                                       |
|                             | Fistula                      |                                       |
|                             | None                         |                                       |

#### Tick if any of the following resulted:

|                      |  |
|----------------------|--|
| Thromboembolic event |  |
| Haematoma            |  |
| Death within 30 days |  |
| Blood transfusion    |  |
| Return to theatre    |  |
| Unplanned ICU stay   |  |
| LOS >21 days         |  |
| Readmission <30 days |  |
